An Information
Technology Services
Company

1 The Client: An SAP Gold Partner that provides full-service SAP consulting to small and medium enterprises.

It was a finalist for 2020's SAP Pinnacle Award in the SAP S/4HANA Movement Partner of the Year Category.

2 The Need: The client needed six SAP trainers to blueprint a digital roadmap, build a solution, train the users and finally, upgrade the system.

3 The Plan: First, K2 established the client's required skill set and budget. Within 48 hours of the initial communication between K2 and the client, we presented them with eight consultants that matched the skill set and rate.

Within a week, K2 was able to secure four out of the six SAP trainer openings.

4 The Result:

We delivered innovative solutions to the client in a very short amount of time, despite being under pressure to source candidates quickly. We offered the client enough a big enough pool of professionals that the client could choose exceptional talent that was best suited to deliver the project.

The people used their skills and capabilities to guide the project smoothly and successfully for the client.
